

# What Can I Do With a Major in... **Humanities**

## **What is Humanities...**

The humanities can be described as the study of how people process and document the human experience. Programs focus on combined studies and research in the humanities subjects as distinguished from the social and physical sciences, emphasizing languages, literatures, art, music, philosophy, and religion. These modes of expression have become some of the subjects that traditionally fall under the humanities umbrella. Knowledge of these records of human experience gives us the opportunity to feel a sense of connection to those who have come before us, as well as to our contemporaries. .
