This is an advanced course in drawing that furthers student problem-solving via describing basic forms with various methods and media. Elements of Art and Design are used, which are: line, shape, form, space, texture, value and color, shall be employed through out the course: Line, form, shape, Value is presented as a key element in determining light and dark relationships, and transitions of value are seen in representing form (positive space) and space (negative space). Texture and related qualities are examined as distinctive qualities of roughness or smoothness. Color includes value (addition of white OR black), intensity (which neutralizes a given color by adding the complement, or color opposite on the color wheel), and Hue variation (by adding colors next to the given hue on the color wheel). Color assignments will be carried out with oil pastel (sometimes + turpenoid) and Q-tips, watercolor pencils, colored pencil, (chalk) pastels, and warm and cool markers. Emphasis is on a creative response in developing a personal style in drawing.

ART 203 Students focus on Drawings that develop a <u>personal style</u>. Students have a choice of media through a variety of individual assignments. The course relies on mastery of skills and techniques learned in 201 and 202 courses. The drawings produced in this course should be portfolio quality.

CLASS PROCEDURES

Studio sessions will be accompanied by lectures, slides and demonstrations. Because this is an intermediate to advanced class, students are expected to be familiar with basic drawing techniques (**PREREQUISITE--ART 202 "C" or better**). Class discussions and critiques of completed assignments will assist students in evaluating their own work and in communicating their observations of classmates' work in a supportive manner in which to learn.

Assignments will be carried out in class. Homework will include 4-or more hours/week.

EVALUATIONS AND GRADING:(

LATE ASSIGNMENTS = ONE GRADE REDUCTION PER DAY LATE!)

A. Class progress one point per day 15 points

B. Solutions to class projects which demonstrate an understanding of course content Evidence of initiative and creative response to assignments.

50 points

D. Homework 25 points
E. Critiques 10 point

F. Total: 100 points

LAMC Art Professor . . . BARBARA

What is intrinsic about this artwork?

That is the question Barbara Kerwin asks when she looks at a student's drawing or painting. It ry to see the nugget of their personal interests and abilities in what they bring to the studio classes."

That is how Kerwin, a full-time art professor at Los Angeles Mission College (LAMC), describes her process when evaluating students' artwork. The students in her advanced classes are talented, passionate and would like to become artists someday – whether in the area of design or Fine Art – these students will play an essential role in shaping the world in which we live by way of expression and style.

About her own art, Kerwin says that she has been working with the rectangle, Minimally, in sequence, as a grid, and overlapping, for well over a decade. During her undergraduate years she studied on an architecture scholarship, which in part explains her love of structure. But, her passion for art and sense of awe comes from time spent living in great nature. Her parents raised their five children during her early years on a 160-acre wilderness ranch in Washington State. In elementary school she would check out books on art from the library, hold her hand over the caption beneath the painting and quiz herself. What she realizes today is that the library books taught her an appreciation for formal composition and personal style recognition. It is a way of seeing she uses when teaching and critiquing drawing and painting. She also describes art as a love affair. It is what interests her more than all of the other ideas she embraces and plays with mentally. She cannot live without art. 'If there is no art on a wall, I become anxious."

Since coming to Los Angeles at age 23 with her actor husband, she has learned a great deal. She was mentored by a high-powered curator/critic. Tve found, if I'm true to myself, and I'm working hard at my new idea and need assistance, help arrives and doors open. It's happened so often, it is a belief."

Kerwin has been teaching full time at LAMC since spring 2001. "I teach a variety of art courses from Beginning through Advanced Drawing and all levels of Painting-Intro through Painting III. "My philosophy is to get students to think creatively. My classes introduce students to art making with a variety of methods and media. At LAMC's Institute of Arts and Multimedia (IAM), our goal is to produce artists who are trained to create with technology; the art training comes from the studio art side of the program, and the art with technology from our multimedia classes. Our students arrive at their 4-year institutions at the top of their classes, and many have gone on to distinguish themselves there.

Kerwin has attracted galleries, collectors and critics who appreciate her work. She has exhibited in more than 100 galleries and museums throughout the U.S., and has almost as many collectors.

La Galleria Gitana, in the city of San Fernando, is currently hosting three large, Minimal works by Barbara Kerwin. The exhibit, 'Sacred Art / All Things Spiritual' includes a variety of artists whose work involves the idea of the sacred. Her work (on loan, courtesy of Ruth Bachofner Gallery, Santa Monica) is on display through December 24, 2009.

She was recently selected from nearly 1,000 artists to appear in New American Paintings, No. 85 by Dominic Molon, Curator, Museum of Contemporary Art in Chicago.

Kerwin is a featured artist in Encaustic: A Guide to Creating Fine Art with Wax, Watson-Guptill Publications, Crown Publishing Group's upcoming book by Lissa Rankin, M.D.

Kerwin holds three degrees in Art: a Bachelor's Degree, Master's Degree, and an MFA. ■
