Electronic Message Board

Mission college has installed an electronic message board located at the front of the college, facing Hubbard and Eldridge Ave. The message board is used to display important announcements to the students and the local community.

Student Learning Outcomes and Assessment Management System

The college has developed a web-based system to improve and simplify the process of developing, assessing, tracking, and reporting on student learning outcomes. The system will be implemented in fall 2010. Training will be scheduled for later this semester.

LAMC Portal System

The LAMC Portal System is the basis of all current and future access to online resources and technologies that require faculty/staff authentication. The Portal System also ensures that you are listed in the online campus directories. Portal access is essential for you to be able to access the new and exciting technologies we have to offer at Mission College. If you already have a @lamission.edu email account then you already have Portal access. If you do not, you can request a @lamission.edu email address by submitting an online work request at [http://www.lamission.edu/facstaff/workrequests.aspx](http://www.lamission.edu/facstaff/workrequests.aspx) or have a secretary submit one for you. Some of the features include:

- Update your profile, course schedules and syllabi.
- Access to faculty resources included class roster, course management and FLEX system (see FLEX system).
- Submit electronic SmartCopy requests online (see SmartCopy system)

LAMC Portal System workshops will be scheduled at the request of the Department Chair

EZ Proxy

Students can how access the various library database systems from the comfort of their homes. A solution has been implemented that allows students to authenticate and access library database systems that were only accessible from the library before.
YouTube EDU

Mission college has partnered with YouTube to bring the latest information and educational material to students, faculty and the community. Mission College has an official YouTube channel (http://www.youtube.com/lamissioncollege) which can be accessed from the college homepage.

VDI (Virtual Desktop Infrastructure)

A virtual desktop computing solution has been implemented in the library and Title V learning center which increases computer lifespan, consumes less power and provides an easier method of management.

New College Website

Mission College has updated the main website to a new template using the latest technologies such as HTML 5, JQuery and CSS. Access to frequent resources has been placed on the homepage to provide faster access with less clicks to common areas.

Adobe Site License

The Los Angeles Community College District has partnered with Adobe systems to bring the latest Adobe products to faculty & Staff. A complete site license along with a wide selection of products can now be deployed to any campus computer.
