Associate in Science Degrees ~ LIFE SCIENCES

Associate Degree in BIOLOGY

Graduates with an Associate Degree in Biology can look forward to technical careers and work closely with scientists and biologists in many different industries. Some graduates obtain their degree as a stepping-stone to a four-year degree, others turn their interest into a career.

Careers: Dentist, Physician, Pharmacist, Anesthesiologist, Podiatrist, Optometrist, etc.

Lab Technicians work in hospitals, clinics and medical research labs.

Histologic Technicians prepare blood and tissue samples for microscopic examination by a pathologist.

Biological Technicians help biological and medical scientists conduct laboratory tests and experiments.

Research Assistants work at medical research labs or at universities.

Environmental Technicians may work for recycling or waste management companies, manufacturing companies or utility companies. They help companies ensure they are in compliance with environmental regulations and help clean up environmental problems.

Associate Degree in HEALTH SCIENCES

The Associate Degree in Health Sciences provides you with an opportunity to pursue many careers in the healthcare industry. According to the Bureau of Labor Statistics, the healthcare industry will generate 3.2 million jobs between 2008 and 2018, more than any other field.

With an associate degree in Health Sciences, you may be employed in a hospital, nursing and residential care facility or a physician's private office.

This degree can also be a stepping-stone to transfer to a four-year degree or to nursing, medical technician, ultrasound technician, pharmacy technician and many more programs.

Internship Opportunities

A great way to expand your horizon is through internships. The STEM (Science, Technology, Engineering & Mathematics) Program offers summer internships in collaboration with CSUN and UCLA. Some of the internships only pertain to Life Science majors.

For information on the degree requirements, please contact:
Professor Mike Reynolds
Life Sciences Dept Chairman
