

What Can I Do With a Major in... Certified Nursing Assistant

A **Certified Nursing Assistant (CNA)** helps patients or clients with healthcare needs under the supervision of a Registered Nurse (RN) or a Licensed Practical Nurse (LPN). In many cases, CNAs serve as the RN's or LPN's eyes and ears, and relays information between many patients and nurses. Nursing assistants fulfill basic quality-of-life needs for patients of any age in residential nursing care facilities or outpatient clinics. Since nursing assistants have daily contact with patients, they are gatherers of vital information about the patients' conditions, which they must then transmit to their supervisors.
