(a) ESL	<input type="text"/>	8.3%	n=315 av.=2.5 dev.=0.6
(b) Below English 101	<input type="text"/>	35.6%	
(c) English 101 or above English 101	<input type="text"/>	56.2%	

5. Which of the following best describes your everyday problem solving ability?

- (a) I can usually find a solution to my everyday problems. 79%
- (b) I can sometimes find a solution to my everyday problems. 18.1%
- (c) I can rarely find a solution to my everyday problems. 2%
- (d) I can never find a solution to my everyday problems. 0.8%

n=353
av.=1.2
dev.=0.5

6. Which is the most important reason for evaluating information found on the Internet?

- (a) Authors who publish on the Internet are typically less skilled than those who publish in print. 3.9%
- (b) Web writers are usually biased. 4.2%
- (c) Anyone can publish on the Internet; there is no guarantee that what you are reading is truthful or objective. 81.2%
- (d) Information found in print is almost always more accurate than that found on the Internet. 10.6%

n=357
av.=3
dev.=0.6

7. Evidence shows that people who live in the Antarctic score higher on happiness surveys than those who live in California. Which is the best conclusion that can be drawn from this data?

- (a) Californians would be happier if they moved to the Antarctic. 10.5%
- (b) People in colder climates are happier than those in warmer climates. 32.8%
- (c) There are only happy people in the Antarctic. 4.3%
- (d) Those in the Antarctic who scored high on a happiness survey probably like snow. 52.4%

n=351
av.=3
dev.=1.1

8. Which type of website most likely provides the most objective information about President Ronald Reagan?

- (a) The home page of a history professor who wrote a book on Reagan's presidency 41%
- (b) A Confederate group's site with the most pages devoted to Reagan 11.5%
- (c) The site of a republican group that archives Reagan's correspondence 21.3%
- (d) The Republican Party's website 26.1%

n=356
av.=2.3
dev.=1.3

9. Which of these situations does NOT require problem solving?

- (a) After you get your new computer home, you find there is no keyboard in the box. 8.2%
- (b) When you get your pictures back from being developed, you realize they are someone else's. 11.6%
- (c) Everyone on your team wants to celebrate at the Burger Queen, but you just ate there last night. 73.4%
- (d) You've been assigned to finish a report for tomorrow morning, but it is your son's birthday, and you promised you would take him to a concert tonight. 6.8%

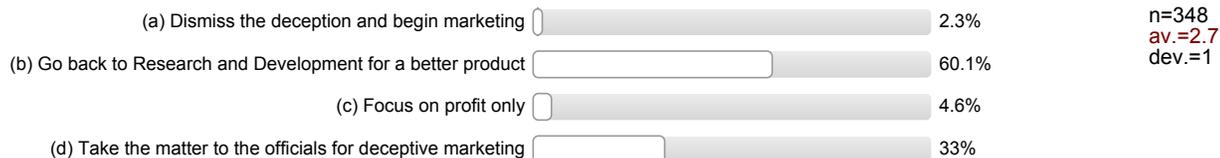

n=353
av.=2.8
dev.=0.7

10. Which of the following is a sound argument?

- (a) Rain was predicted yesterday, so I took my umbrella to our outdoor rehearsal. It didn't rain. To make sure it doesn't rain during today's rehearsal, I'll take my umbrella with me. 8.8%
- (b) You and Chris broke up the night you had dinner at Al's, so don't worry; you and Kelly won't break up as long as you never go to Al's! 10.2%
- (c) My science teacher bases a lot of our grade on class participation. Last quarter, he said I needed to participate more. If I want a better grade this quarter, I need to take part in more class participation. 66.2%
- (d) Our freezer is broken. The last time we had trouble with it, we hired a new repairman. He's probably the reason the freezer broke! 14.8%

n=352
av.=2.9
dev.=0.8

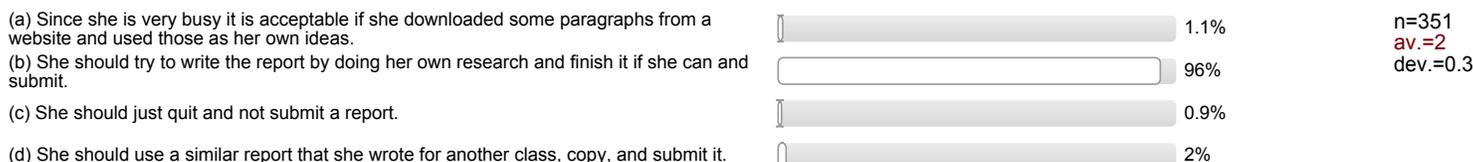

11. A certain marketing team presents a children's cereal brands with "Less Sugar" ad campaign for three of their brands. Large print and dynamic type on the package exclaiming "75% LESS SUGAR" will catch the parent's eye and increase sales. Concerned about their children's weight gain, parents will purchase the cereal. The carbohydrate content of the less sugar product, however, is the same as high sugar version, at best only 10 fewer calories per bowl, so it offers no weight loss advantage. The brand manager, Debby's immediate reaction is "This marketing campaign is unethical." What should she do?

12. Doug has a low-paying job for a telecommunications company. Every day when he goes home from work, Doug puts a headset, a stapler, or something similar in his lunch box and takes it home with him. Doug sees nothing wrong with his behavior since he feels inadequately paid. Is his level of thinking correct?

13. Sara is taking a science course and is required to submit a report on Evolution by tomorrow. She has a full time job and does not have too much time to spend on her report. What should she do?

- Family and Consumer Sciences
- Finance
- Gerontology
- Graphic & Web Design
- Health Science
- Health Sciences
- History
- I am enrolled in the Paralegal Studies Program, which is a State Certificate Course, no degree.
- I am not aiming for a major, I am an entrepreneur honing important skills which are vital to the survival and advancement of my business.
- I believe an argument is reasonable for my situation because for the past four semesters I have registered to a class with a certain professor and when the class begins to meet the mission changes my professor and does not let the student know. I think that the mission is acting in a way where it is letting us the students know that it does not matter what the students want but what the mission wants to do... I think that's not fair and it's uncalled for.
