Organizing Your Chemistry Laboratory Notebook

Developed By: Gabriel Chavez
(Learning Assistant)

SSC Coordinator/Activity Director: Lilit Haroyan
SSC Advisor/Faculty: Dr. Mike Fenton
Technical Support: Hagop Hadjinian

Funded by: Title V HSI ISSA, Department of Education
Sources: Google, Chemistry Lab Manual Provided by Physical Science Department
Lab Notebook will Begin with a Title Page

Course:
Section Number:
Semester:
Instructors Name:
Your Name:
Locker Number:

All data should be in INK
Copy all the index as it is in your Lab Manual.
Bibliography

Laboratory Text
Title, Author, Publisher, Date
This will be your first Lab Recording

After this page the rest of the experiments will have the same structure.

Make sure you date every experiment.

Don’t forget to include you UNKNOWNS.
Always Remember

Left Side
Designed for Notes and Calculations

Important
Always write down the tools used to perform the experiment (ex. Glassware)
If you have a hard time remembering the tools you should draw them.

Right Side
Designed for Lab Experiment Procedures and Data

Important
Write down a summarized procedure to help you during your lab exams.
Once you receive your graded lab, you should go into your lab notebook and make the appropriate corrections.
Learn the Glassware List

There will be more items listed on your inventory. Make sure to include them.
Tips to a Successful Lab

1\textsuperscript{st} Organize your Lab Notebook.

2\textsuperscript{nd} Read Labs before Class and Follow Procedures. Watch any Videos that relate to the Lab.

3\textsuperscript{rd} Date every Experiment.

4\textsuperscript{th} Memorize all tools used in Experiments

Finally remember that your exam’s grade will reflect the work you put into the Lab Notebook.
