organic molecular structures, bonding, nomenclature including conformational analysis, potential energy plots, hybridization, stereochemistry and functional group chemistry, with emphasis on reactions and reaction mechanisms. It also includes the applications of instrumental methods in functional group analysis and identification of molecular structures. In the laboratory students learn the essential skills and techniques of preparation, isolation, purification, and analysis of organic compounds by employing standard and modern instrumental methods. This course also emphasizes the use and interpretation of Nuclear Magnetic Resonance (NMR), Infrared (IR) Spectroscopy and Gas Chromatography (GC) in the analysis and identification of organic compounds.

This course is part of the transfer sequence for careers in the physical, biological, and health sciences and a requirement for the Associate of Sciences degree in Chemistry.

 This is the main section of E.S.L. 110. Students must register for this section and the lab component of E.S.L. 110. This English composition transfer-level course is designed for non-native English speakers and emphasizes preparing students for the writing and critical reading demands across the disciplines by covering academic genres representative of the college at large. Students receive instruction in expository and argumentative writing, appropriate and effective use of language, close reading, cogent thinking, and research strategies. An additional focus is integrated grammar and academic vocabulary instruction based on needs typical of second-language learners. This course is equivalent to English 101. Students may take E.S.L. 110 as an alternative to English 101.

This class requires students to work online independently each week for the amount of TBA time shown in addition to completing assignments.

MATH 270- Linear Algebra (UC/CSU) - 3 Units

Requirement Designation: Meets IGETC 2A CSU B4

Enrollment Requirement: Prerequisite: MATH 266

Math 270 develops the techniques and theory needed to solve and classify systems of linear equations. Solution techniques include row operations, Gaussian elimination, and matrix algebra. Investigates the properties of vectors in two and three dimensions, leading to the notion of an abstract vector space. Vector space and matrix theory are presented including topics such as inner products, norms, orthogonality, eigenvalues, eigenspaces, linear transformations, and diagonalization. Selected applications of linear algebra are included.

This course is the second part of a sequence of two designed for students who are speakers of Spanish but have had little or no academic preparation in standard Spanish. Students continue improving their reading and writing skills and vocabulary expansion and continue to increase their awareness and proper application of linguistic registers and Spanish grammar. Students practice discussion, listening, reading, and writing in the context of the geography, customs, and cultures of the Spanish-speaking countries and of the Latino experience in the United States. Prerequisite: Spanish 35 or equivalent preparation. Credit is given for Spanish 3 or Spanish 36, but not for both.

VOC ED 801CE- Non-Traditional Leadership (Repeatable) - 0 Unit

2023 Fall SCHEDULE

Los Angeles Mission College

Non-traditional leadership is a social change metaphor intended to draw attention to individuals whose leadership skills emerge from cultural, social, and political conditions that shape their community. Non-traditional leaders are the unsung stakeholders who are distinguished by their intuitive knowledge of how to get things done, their influence with others, their ability to cultivate new relationships, and their refusal to give up on their community. They are community connectors working below the grassroots; driven by enormous hearts and gifts to bring people together to actualize a community enhancement vision. This course is designed to increase the capacity of non-traditional leaders to make a difference in their community by enabling them to identify common values, strengths, hidden assets, existing resources and leadership formations below the grassroots; so that they may design a common vision and take strategic action to enhance their community using the opportunities of the civic process.

VOC ED 803CE- Community Organizing for Civic Engagement (Repeatable) - 0 Unit

This course introduces students to the strategies and tactics used by advocates in the role of a community organizer to increase civic engagement and participation. Community organizing is a process that coordinates cooperative efforts into problem-solving campaigns that educate stakeholders and build power to affect change for community enhancement. Students will learn theoretical principles and how to apply them.

VOC ED 805CE- Framing Compelling Messages & Social Media Campaigns (Repeatable) - 0 Unit

Students will learn how to use the steps of framing to shape how a community story is perceived. The manner in which a story is presented can unlock change and increase community engagement through structured campaigns. When well framed messages are integrated into community-based campaigns using intentionally designed social media practices, agencies can build an online community that persists beyond the campaign.

VOC ED 806CE- Program Design and Evaluation (Repeatable) - 0 Unit

Many community-based organizations struggle to measure the impact of their programs and services. However, stakeholders and funders expect evidence of impact and the value of their donations and investments. Strategic program design and evaluation can build the capacity of a community-based organization to achieve its desired goals. This course introduces logic models for planning programs with the end in mind while tracking logistics and success along the way. Students will become familiar with how to describe a community service program and evaluation results in the context of the public health model.

VOC ED 807CE- Fundraising and Resource Development (Repeatable) - 0 Unit

Clear and powerful storytelling can shape the way others choose to contribute their money and resources to a community-cause. When non-traditional community leaders understand the interplay between their story, their role in the fundraising landscape, and the manner in which to present community projects that considers the expectations of funders, the chances of acquiring desired resources increase. Students will develop a philanthropic autobiography statement that guides how to navigate the world of fundraising. The course will introduce how to identify grant funding resources, developing donors, basic grant writing, and other approaches to empower non-traditional leaders and community-based organizations to sustain their work to improve social conditions.
