

Summary of Comments about ILO Online Survey and Slo Online System

- 1) Post ILOs in classroom
Have ILO survey made a part of classroom activity—increase number of students.
Seminar was great!
- 2) It would be a good idea to get faculty feedback/input about the seven ILOs.
- 3) (ILOs) –Student assessments should be given to instructors to assess students in class (hard copy) just like CTEA funds.
Pages handout—(agenda packet)
- 4 Assessments—are done in two stages, written and practical
- 5) Assessment—
 1. 12% response is (?)invalid
 2. Need at least 50% for valid criteria
 3. Make the ILO as a class assignment
 4. Then refine the survey questions
- 6) Give student outcomes survey in-class (How do we know which of our students have had 30 or more units?)
- 7) Give the survey to more students. The results may not be accurate with such low numbers. Also, please include questions related to student services.
- 8) PLEASE provide a sample of an S.L.O. for Student Services areas. Example:
Financial Aid Programs
Admissions & Records
Counseling Programs including DSPS and EOPS
Thank You!
- 9) Counseling uses a survey to evaluate its SAOs.
- 10) Faculty should post their rubrics on their web page.
- 11) Would it be possible to list the students who have been selected to be assessed in alphabetical order. This would help a lot.

- 12) Can the survey be done during finals as part of each class? Then students can also indicate which class they are in for more data categories and a deeper understanding of which courses support ILOs?
- 13) SLO online site is easy to use
- 14) Double Check_that instructors have access_to the system.
- 15) Add “ALL” input for sample size.
- 16) “ALL” option—tied to the DEC

Access to results of surveys. Our students have taken the survey but we do not know how to access the results.

Survey specific to A discipline would be helpful in assessing our discipline SLOs.

- 17) There needs to be a DATE that would post the last time course SLOs have been updated so it stays aligned w/curriculum update.
- 18) Online SLO System Suggestion: Should be able to correct rubric after initiate assessment instead of starting over.
- 19) More incentive to get students to participate in the survey. Perhaps some extra credit or make it an assignment?
- 20)
 1. Include all students in the SLO.
 2. ILO => why was the student response so low? Only 12%?
 3. It would be interesting to see the views of those who did not return the surveys.
 4. Why didn't they finish and submit?
- 21) Can we please have extended training on creating rubrics and editing existing rubrics. Thank you.
